

Considering a new boat?

Perhaps you have an old boat which is becoming outdated, and you want to keep her best features while improving on the weak points. Perhaps you want to diversify or move into a new sector. You may have seen a vessel you admired and want your new boat to share some of those features. Or perhaps you have new ideas and want to incorporate them into an innovative design. Whatever your requirements, we can work with you to produce a boat to best meet your needs.

The next step

If you want a quote for a new design, please contact us at the address/telephone number below or arrange a meeting at our office or trade show. As a start you can consider the information below to give us a brief outline of your requirements, fill in the lower part of the sheet and return it for our consideration.

MDI Design packages

You need:

A basic design to crystallise your ideas and get estimates of the cost of building a new boat

We can provide:

An initial General Arrangement drawing and outline specification

You need:

Enough information to obtain formal quotes from boatyards and move into a build contract

We can provide:

A General Arrangement drawing tailored to your exact requirements, initial stability calculations, material estimates, structural midship section and full specification

You need:

A full design to Classification Society/Flag requirements, from keel laying to launching.

We can provide:

Full structural drawings; liaison with the authorities and your selected Classification Society (if required); supervision of the building process; inclining experiment, full stability calculations and final Stability Book. We can provide drawings and cutting data to suit a wide range of yards and building practices.

Proposed New Design

Length	Engine(s)?
Breadth	
Depth	Deck equipment?
Draught	
No. of crew	Wheelhouse equipment?
Fishing method	
Operating area (inshore, open water, deep sea)	Layout preferences?
Capacity (tonnes)	Usual length of voyages
